

Fun New Glaze Combo's from Christy's class

**Texture always
enhances the action
of the glaze!**

To the left and right,
PG641 White Cloud is under
GLW03 Avocado Ice on our
White Salmon clay body.

All over/under combinations are done by brushing 2 coats of the underneath glaze and then 1 coat of the second glaze over the top.

GLW03 Avocado Ice over
GLW46 Northern Lights

GLW39 Vanill Cream over
GLW27 Emerald Wood Ash

PG616 Buckwheat over
GLW34 Ohata Red

GLW08 Copper Patina over

PG616 Buckwheat over
GLW26 Mustard Wood Ash

GLW40 Raspberry Matte
over PG616 Buckwheat

GLW03 Avocado Ice over
PG642 Blizzard Blue

GLW32 Latte over
GLW46 Northern Lights

Fun New Glaze Combos from Christy's Glaze Class

GLW06 Liquid Luster Bronze
over PG642 Blizzard Blue

GLW46 Northern Lights over
GLW36 NW Woods Green

GLW06 Liquid Luster Bronze
over PG641 White Cloud

GLW36 NW Woods over
GLW46 Northern Lights

GLW26 Mustard Wood Ash
over PG616 Buckwheat

GLW08 Copper Patina
over GLW30 Cinnamon

GLW41 Cool Lime Matte over
GLW06 Liquid Luster Bronze

GLW45 Plum Black inside
PG616 Buckwheat over GLW32 Latte

Creating 'FLOW' in your glaze surface

This piece: 2 coats GLW36 NW Woods under PC603 Amber + PG641 White Cloud over.

My glaze class is a whirl wind of products, ideas, techniques, and just getting a handle on the basics of finding a glaze surface that is appropriate for your work. This time most of my class wanted to have some glazes that "flowed". I have worked for years to take that crazy element out of our glazes ... so my challenge was to find them a way to create this look in a stable and reproducible method. My answer was a Mayco product called Pottery Cascades. These glazes come in 4oz containers are only available in 2 colors. PC603 Amber & PC604 White Cloud have been discontinued.

PC601 Clear
PC602 White
PC603 Amber
PC604 Black

1. GLW30 Cinnamon base
2. PC604 Black Cascade
3. PG641 White Cloud

To use Cascade glazes with our glazes:

1. Apply 2 coats of your choice base glaze.
2. Apply 1 (or 2, but be very careful!) coat(s) of Cascade glaze to top third only of your piece. This can be your only top color ... or ...
3. Apply 1 coat of your choice of contrast glaze over the top of the Cascade glaze.

1. Pots have a base combination of:
GLW22 Rusty Nails under GLW32 Latte.
2. PC602 White Cascade
3. PG641 White Cloud

We found the Cascade glazes to be compatible and a good fit on our clay bodies. We saw no evidence of crazing to deter their use with food items.

The carving enhances the flow creating directionality for the glaze

1. Base glaze 2 coats of GLW36 NW Woods Green Matte
2. PC603 Amber Cascade
3. PG641 White Cloud
(Clear Cascade + PG646 Northern Lights will also produce this coloration).
