

**STONEWARE CLASSIC:** Mayco formulated this line of glazes, including Opals, and Ice (translucent) glazes, for cone 5-10 clay bodies. Fired finishes include gloss, high gloss, and flat in color, and range from bright and vibrant to earthy and subdued. Try them at various temperatures and in both oxidation and reduction, and on various clay bodies, for great color variations.

**STONEWARE MATTE:** From solid shades to those that create interesting color variations as they move and break. These glazes go from solid, opaque coverage, while others are semi-transparent and variegated. Application thickness is key to making the matte glazes work for you. They work well on a variety of clay bodies and fire between cone 5-10.

**STONEWARE CRYSTALS:** A unique line of glazes that contain colorful crystals in the glazes that are designed to melt and bloom during the firing. These crystals add variation in color, finish, and movement to the glaze. This line of glazes begin with a base glaze, which can be found within the classic glaze lines. Information about these base glazes are found on the label or go to the Mayco website.

**\* We stock these glazes in gallons! All other gallons are special order only.**

**\*\* We also carry SW155 in DRY 10lb bags, but all other dry glazes are special order in 10lb bags. Call for availability and ETA.**
